DenTech China 2025 Review

Great Achievement During DenTech China 2025

DenTech China 2025, the four-day Shanghai dental exhibition, concluded successfully at the Shanghai World Expo Exhibition and Convention Center. This year's exhibition saw significant improvements in both the number of exhibitors and the quality of visitors compared to previous years.

Despite a highly competitive market environment, domestic and international professional visitors attended and placed orders. Furthermore, DenTech China 2025 newly planned a variety of on-site activities, providing a free exchange platform for industry experts, key opinion leaders, clinic operators, dentists, and other professionals. Industry professionals spoke freely, shared their insights, and learned from each other, witnessing the industry's confidence.

With the support across the country, DenTech China continues its efforts to build bridges for sino-foreign dental exchange, hosting dozens of academic conferences concurrently to provide continuing education resources for industry professionals. DenTech China is working together with Chinese dentistry to advance.
